

R&R Ideas, Ltd has been a member of the first and largest licensed packaging waste management organisation "Žaliasis taškas"(Green dot) for 7 years. As part of Green Dot, we are part of a responsible and reliable international network.

"The Green Dot" label symbolises the closed-loop (circular) economy, where all waste is transformed into raw materials, thus saving the environment. It means that the producer or importer has paid for the proper management of the packaging bearing the label. By purchasing a Green Dot labelled product, the consumer is helping to conserve natural resources and protect the environment by making sure that the used packaging goes to the right waste collection container. "More than 170,000 companies worldwide use the „Green Dot“ label and more than 460 billion packages have been labelled.

„Green Dot“ customers are entitled to use the „Green Dot“ label for the packaging of products they distribute. The right to use the label is granted for one year for the type of packaging for which „Green Dot“ manages the waste.
